Subject: Cover letter for a foreign internship

Dear Sir, Madam,

I am currently a student at an engineering school with a focus on digital science and client projects. I am seeking a three-month internship abroad during the summer and would like to apply for a position within your company.

My educational background has allowed me to develop skills in various areas such as computer science, electronics, scientific subjects, English, and teamwork and communication skills that I have acquired during my projects. I also have professional experience as an accounting assistant and machine operator in different companies.

I am particularly interested in your company because it is recognized for its expertise in the fields that I am interested in for my studies. Additionally, I am attracted to Canada because of the opportunity to improve my English while discovering a new culture and way of working.

This foreign internship will allow me to gain international work experience and develop my technical and linguistic skills. I am ready to fully invest myself in the tasks that will be entrusted to me and to contribute to the success of your projects.

Thank you for considering my application, and I remain at your disposal for any interview that you may deem necessary.

Sincerely,

Romain DUJARDIN
